

Student Activity Group "GAS". GAS operates at the Institute of Construction and Engineering Design. The mentor is dr inż. Magdalena Nakielska (e-mail: magdalena.nakielska@byd.pl). The main goal of the group's activity is to expand knowledge in energy-efficient construction, including legal requirements in the field of humidity and humidity protection of buildings and the use of modern materials insulation. The founder of the circle was a student in the field of "construction" lady Katarzyna Stefańska. As part of GAS, trips to Norway were organized during which get acquainted with the implemented buildings, modern technologies, the use of renewable energy sources, thermal insulation materials, regulations design and implementation and operation of construction works. In addition, GAS students participated in trips to The 25th International Construction and Architecture Fair BUDMA in Poznań. Graduates of the 'construction' faculty participate in GAS meetings. At group meetings discussions are conducted in the field of designing energy-saving facilities
